RE: Extension of National Preparedness Goal and Target Capabilities List National Review

Dear Homeland Security Partner:

Hurricane Katrina has engaged much of the emergency community across the Nation in supporting massive response, recovery, and mitigation operations. In light of such efforts and the opportunity to incorporate immediate lessons learned, the Office of State and Local Government Coordination and Preparedness has extended the period for review and comment on the National Preparedness Goal and the Target Capabilities List (TCL): Version 2.0 **through October 14**.

This adjusted timeline will ensure that all stakeholders and disciplines have the opportunity to review both documents and allow SLGCP to continue working with subject-matter experts on additional refinements.

The following target capabilities have been refined *since* August 15 and new drafts have been posted for review:

- Risk Management
- Citizen Preparedness and Participation
- Information Gathering and Recognition of Indicators and Warnings
- Intelligence Analysis and Production
- Intelligence / Information Sharing and Dissemination
- Law Enforcement Investigation and Operations
- CBRNE Detection
- Triage and Pre-Hospital Treatment

The Goal and TCL review can be accessed via the Lessons Learned Information Sharing (llis.gov) website. If you are not currently registered on LLIS.gov, please visit <https://www.llis.dhs.gov/signup/index.cfm> and complete all required registration fields and click the "Submit" button. For Membership Eligibility Verification, identify your organization/association and explain that you are accessing the national review.

We thank you for your commitment to this critical initiative. Your input is strongly valued and will guide how the Nation prepares to prevent, protect against, respond to, and recover from all major events.

Sincerely,

A handwritten signature in blue ink, appearing to read "Matt A. Mayer".
